PROJECT REVIEW 1

Introduction:-

The project Criminal Record Management System is a Criminal record management system that uses to record crime activities of criminals. It can be used to report crime activities. This project is mainly useful for law and enforcement agencies. The law and enforcement authority can preserve records of the criminals and search any criminal using the system. This is an online web application with database system in which police will keep the record of criminals who have been arrested. The projects interface is very user friendly and helpful for authority.

The system currently existing is manual involving a lot of paper work, this lead to inaccuracy and inconsistency in data. This method is time conceiving and there are high chances of losing this data.
It is hard to delete, update or view this data because it is hard to maintain record of criminal in a vast country like India making it difficult to maintain and retrieve the detailed record of the passengers.
Unauthorized access can be prevented since the system provides different user-ids.

Use of Criminal Record Management System:-

- In modern days crime is increasing day by day.

- To combat such crimes and to provide safety to citizens, police department plays a vital role.

- The correct information provided by the people to police helps a lot in arresting criminals.

- In order to increase efficiency and save time, our project implements a CRMS (criminal record management system).

- This is an online web application with database system in which police will keep the record of criminals who have been arrested.

Product Scope:-

- To record improvement and decline the rules and regulation activities of the Country.

- To keep record of criminals details for future investigation

- To keep record of criminals crime activities

 - Reduce manual and redundant records keeping

- Facilitate interaction and sharing of information among police departments, districts, state/headquarters and other police agencies

- Building security and monitoring control to ensure only authorized personal have access to the criminal information
